## EDUCATION

Department of Business Economics, University of Delhi	2023 – 2025
MBA (Business Economics), Analytics & Marketing	CGPA: 8.00/10
Thapar University, Patiala	2018 – 2022
B.E. in Electronics and Communication Engineering	CGPA: 8.27/10

## TECHNICAL SKILLS

Tools	Python (pandas, NumPy, scikit-learn), SQL, Excel, Power BI, Stata, SPSS
Analytical Skills	Econometric Modelling, Forecasting, Machine Learning, Data Visualization

## RELEVANT COURSEWORK

- Time Series Analysis
- Marketing Research
- Predictive Analytics
- Simulation & Modeling

## EXPERIENCE

<b>ITC Limited, Marketing Analyst Intern</b>	<b>Jun 2024 – Jul 2024</b>
<ul style="list-style-type: none"><li>◦ Conducted 50+ structured surveys across rural markets to evaluate pricing sensitivities and consumer behavior; insights led to a 60% surge in regional sales through optimized trade schemes.</li><li>◦ Analyzed competitor pricing and portfolio benchmarking, identifying three growth levers to drive market-specific pricing and promotional decisions.</li></ul>	
<b>HFCL, 5G Research and Development Intern</b>	<b>Jan 2022 – Jun 2022</b>
<ul style="list-style-type: none"><li>◦ Enhanced hardware integration in BMC, improving system monitoring and boosting product reliability by 20% through agile methodologies, contributing to the rollout of the 5G Macro Radio Unit product.</li><li>◦ Collaborated with five cross-functional teams, delivering insights via 10+ Power BI reports to stakeholders.</li></ul>	

## PROJECTS

<b>Customer Churn Prediction Model</b>	<i>Python, ML</i>
<ul style="list-style-type: none"><li>◦ Extracted and pre-processed gas and electricity customer transaction data using SQL performed detailed EDA and build a PowerBI dashboard to uncover behavioral churn signals.</li><li>◦ Built Random Forest model with 93% prediction accuracy to identify churn and improve retention rates.</li><li>◦ Identified top churn predictors through feature engineering and improved model recall by 20% through class balancing and tuning.</li></ul>	
<b>Urban Mobility Demand Forecasting</b>	<i>Python, Time Series</i>
<ul style="list-style-type: none"><li>◦ Developed a time-series forecasting model using Prophet to simulate rental demand under seasonal and weather-driven fluctuations, improving model prediction accuracy by 18%.</li><li>◦ Engineered lagged variables, holiday regressors and trend features, significantly reducing MAPE to 16%.</li></ul>	
<b>EV Depot Simulation: Enhancing Urban Charging Efficiency</b>	<i>Python, Simulation</i>
<ul style="list-style-type: none"><li>◦ Modeled a real-world e-bus depot (110 buses, 21 chargers) using Monte Carlo simulations to analyze infrastructure bottlenecks and operational efficiency under multiple charging/fleet scenarios.</li><li>◦ Conducted field visits and stakeholder interviews with DTC depot staff to ground model assumptions; replicated queue behavior and SOC transitions using 330+ charging sessions.</li></ul>	

## ACADEMIC ACHIEVEMENTS

- Semester Topper – Ranked 1st in MBA Semester III based on overall academic performance.
- Finalist – SPJIMR NITI Aayog Case Competition (2024), presented SDG policy reforms for Rajasthan.
